OverView

I'm a software engineer with an experience in developing highly performance web applications with a passion for problem-solving and a commitment to provide quality software apps. seeking a competitive and challenging environment where I can serve your organization and establish a career for myself and use my experience and education to help the company meet and surpass its goals.

Education

Computer Science: **Menofia University**

Sep 2022 – Jul 2026

Frontend Development Diploma: Route IT Training Center

Projects

Fresh Cart

[Github Repo](#) 

Freshcart is a responsive e-commerce web application built with **React**. It offers a smooth and modern online shopping experience featuring product browsing, user authentication, cart management, order placement, and address handling. The project follows a modular architecture using reusable components and React Router for navigation. It simulates real-world e-commerce interactions with a focus on UI and state management.

Fast Pizza

[Github Repo](#) 

A responsive, single-page pizza ordering application built with React, Redux Toolkit, and Vite. The app allows users to browse a dynamic pizza menu, manage a shopping cart, create and track orders, and simulate a delivery experience. It demonstrates strong component design, state management with Redux, and clean project structure using a feature-based folder architecture.

World Wise

[Github Repo](#) 

responsive, single-page web application that allows users to track and visualize cities they've visited around the world. Implemented route protection, and dynamic data rendering using React and Context API. Designed a clean component-based architecture with modular styling. Integrated a static JSON data source and handled global state efficiently across the app.

Technologies

Languages: C++, C, Java, Objective-C, SQL, JavaScript, python, TypeScript, Dart, bash

Data Bases: MySQL, MongoDB, PostgreSQL

Frame works: ReactJS, NextJs, ExpressJS

Web Technologies: HTML, CSS, Tailwind, bootStrap, JavaScript, TypeScript, Tanstack query/virtual, React Router, Redux/Redux Toolkit, NodeJs, Supabase

Other Concepts: Linux, Docker, kubernetes, RESTful API, bash scripting ,

Version Control: Git, Github
